

<u>Position</u>	Product Manager (m/f)
<u>Reporting to</u>	Chief Technology Officer
<u>Location - Travel</u>	Office in Luxembourg – Travel 20 – 30% (mobility on site)

The Product Manager is in charge of bringing the project from a process phase to a finished product.

The main responsibilities will be:

Supervising the design and its implementation on all modules of the final product,

Deciding on the product architecture, the location of components within the product and the supply chain configuration,

Supervising the overall mechanical installation of the product by translating the P&ID into a practical, user-friendly installation,

Managing the product purchasing process and the subcontractors' deliverables execution.

The ideal candidate should meet the following requirements:

Academic background	University degree in either Wastewater treatment, Hydraulics, Electro-technics, Electronics or Mechanical construction.
Professional experience	5 to 10 years of experience ideally in wastewater installations, mechanical constructions or automation systems.
IT skills	Good general knowledge; Inventor and MS Project would be an asset.
Language skills	Fluent in English; German, French or Italian would be an asset.
Soft skills	Entrepreneurial spirit, autonomous self-starter with a strong sense of planning and organization, Business centric approach to R&D and keen for innovation, Hands-on attitude, conceptual and out-of-the box thinking, Good team player, problem solver and attention to detail, Well structured and organized, proactive and resourceful, Well spoken, good listener with strong communication skills.
